10. Error Handling

1. Overview

The Payment Gateway Merchant Compliance API enables merchants to complete their KYC (Know Your Customer) requirements for payment gateway access. The API supports two business types with **different endpoint flows**:

- **Starter Business:** For unregistered businesses/sole proprietors (single owner)
- **Registered Business:** For CAC-registered companies (multiple shareholders)

Base URLs

Environment	URL
Production	`https://gm.irpay.dev`
Staging	`https://staging-gm.irpay.dev`

2. Authentication

All endpoints require Bearer token authentication (except `/compliance/schema`).

Required Headers

```
Authorization: Bearer <access_token>
```

3. Idempotency

All mutating endpoints (POST, PUT) require an `Idempotency-Key` header:

```
Idempotency-Key: 550e8400-e29b-41d4-a716-446655440000
```

Rule	Description
Format	UUID v4
TTL	Keys expire 24 hours after first use
Retry	Same key + same request = returns cached response
Conflict	Same key + different request = HTTP 409 error

4. Optimistic Concurrency Control

Prevents conflicts when multiple browser tabs edit the same record.

```
X-Expected-Version: 5
```

If version mismatch occurs → HTTP 409 Conflict (refresh and retry)

5. Business Types & Endpoint Flows

> ⚠️ **Important:** Starter and Registered businesses use **different endpoints** for some steps. Using the wrong endpoint will result in validation errors.

Starter Business Endpoint Flow

Step	Endpoint	Documents
Profile	`PUT /compliance/profile`	None
Contact	`PUT /compliance/contact`	None
Owners	`PUT /compliance/owners`	`id_document_id` (ID) `proof_of_address_document_id` (address proof)
Bank Accounts	`PUT /compliance/bank-accounts`	None
Agreement	`POST /compliance/submit`	None

Registered Business Endpoint Flow

Step	Endpoint	Documents
Business Details	`PUT /compliance/business/details`	`business_address_document_id` (address proof)
Registration	`PUT /compliance/business/registration`	None
Shareholders	`PUT /compliance/business/shareholders`	Per shareholder: `id_document_id` `proof_of_address_document_id`

Bank Accounts	`PUT /compliance/bank-accounts`	None
Agreement	`POST /compliance/submit`	None

Valid ID Document Types

The following values are accepted for `id_document_type`:

- `nin` - National Identification Number
- `bvn` - Bank Verification Number
- `international_passport` - International Passport
- `drivers_license` - Driver's License

6. API Endpoints Reference

Common Endpoints

Method	Endpoint	Description
GET	`/compliance/schema?business_type=X`	Get form schema (no auth)
POST	`/compliance/start`	Start new compliance
GET	`/compliance`	Get current compliance state
PUT	`/compliance/bank-accounts`	Save bank accounts
POST	`/compliance/submit`	Submit for review

Starter Business Endpoints

Method	Endpoint	Content-Type
PUT	`/compliance/profile`	application/json
PUT	`/compliance/contact`	application/json

PUT	`/compliance/owners`	multipart/form-data

Registered Business Endpoints

Method	Endpoint	Content-Type
PUT	`/compliance/business/details`	multipart/form-data
PUT	`/compliance/business/registration`	application/json
PUT	`/compliance/business/shareholders`	multipart/form-data

7. Starter Business Flow

Step 1: Start Compliance

```
POST /compliance/start
Headers:
  Authorization: Bearer <token>
  Idempotency-Key: <uuid>

Response: { "data": { "compliance_id": 100, "version": 1 } }
```

Step 2: Save Profile

```
PUT /compliance/profile
Headers:
  X-Expected-Version: 1
  Content-Type: application/json

Body:
{
  "country": "NG",
  "industry": "retail",
  "category": "fashion",
  "trading_name": "ACME Store",
  "sales_volume": "100000",
  "business_type": "starter",
  "business_description": "Fashion retail business"
}
```

Step 3: Save Contact

```
PUT /compliance/contact
Headers:
  X-Expected-Version: 2
  Content-Type: application/json

Body:
```

```
{
  "email": "contact@acme.com",
  "support_email": "support@acme.com",
  "phone": "08012345678",
  "address": "123 Victoria Island, Lagos",
  "state": "Lagos",
  "lga": "Eti-Osa"
}
```

Step 4: Save Owner with Documents (Multipart)

```
PUT /compliance/owners
Headers:
  X-Expected-Version: 3
  Content-Type: multipart/form-data

Form Parts:
  "data" (JSON string): {
    "owners": [{
      "full_name": "John Doe",
      "date_of_birth": "15-03-1985",
      "nationality": "NG",
      "id_document_type": "nin",
      "address": "456 Ikoyi, Lagos",
      "state": "Lagos",
      "lga": "Eti-Osa"
    }]
  }
  "owner_0_identity" (file): passport.pdf
  "owner_0_address" (file): utility-bill.pdf
```

Step 5: Save Bank Account

```
PUT /compliance/bank-accounts
Body: { "bank_accounts": [{ "bank_code": "044", "account_number": "0123456789",
"account_name": "John Doe" }] }
```

Step 6: Submit

```
POST /compliance/submit
Body: { "agreement_accepted": true }
```

8. Registered Business Flow

Step 1: Start Compliance

```
POST /compliance/start
Response: { "data": { "compliance_id": 200, "version": 1 } }
```

Step 2: Save Business Details with Address Proof (Multipart)

```
PUT /compliance/business/details    ← Different endpoint!
Headers:
  X-Expected-Version: 1
  Content-Type: multipart/form-data

Form Parts:
  "data" (JSON string): {
    "country": "NG",
    "industry": "technology",
    "category": "fintech",
    "trading_name": "TechCorp Limited",
    "sales_volume": "5000000",
    "business_type": "registered",
    "business_description": "Financial technology solutions",
    "phone": "09012345678",
    "address": "Plot 123 Tech Hub, Lekki",
    "support_email": "support@techcorp.ng",
    "state": "Lagos",
    "lga": "Eti-Osa"
  }
  "business_address_proof" (file): office-lease.pdf
```

Step 3: Save Registration Details

```
PUT /compliance/business/registration    ← Different endpoint!
Headers:
  X-Expected-Version: 2
  Content-Type: application/json
```

```
Body:
{
  "registration_number": "RC1234567",
  "tax_identification_number": "12345678-0001"
}
```

Step 4: Save Shareholders with Documents (Multipart)

```
PUT /compliance/business/shareholders    ← Different endpoint!
Headers:
  X-Expected-Version: 3
  Content-Type: multipart/form-data

Form Parts:
  "data" (JSON string): {
    "shareholders": [
      {
        "full_name": "Adaora Okafor",
        "date_of_birth": "20-05-1980",
        "nationality": "NG",
        "role": "director",
        "id_document_type": "international_passport",
        "address": "12 Executive Estate, Ikoyi",
        "state": "Lagos",
        "lga": "Eti-Osa"
      },
      {
        "full_name": "Chidi Eze",
        "date_of_birth": "08-11-1975",
        "nationality": "NG",
        "role": "shareholder",
        "id_document_type": "nin",
        "address": "45 Business District, VI",
        "state": "Lagos",
        "lga": "Eti-Osa"
      }
    ]
  }
  "owner_0_identity" (file): adaora-passport.pdf
  "owner_0_address" (file): adaora-utility.pdf
  "owner_1_identity" (file): chidi-nin.pdf
  "owner_1_address" (file): chidi-utility.pdf
```

Step 5: Save Bank Account

```
PUT /compliance/bank-accounts
Body: { "bank_accounts": [{ "bank_code": "058", "account_number": "1234567890",
"account_name": "TECHCORP LIMITED" }] }
```

Step 6: Submit

```
POST /compliance/submit
Body: { "agreement_accepted": true }
```

9. Document Upload

File Part Naming Convention

Endpoint	File Part Name	Description
`/compliance/business/details`	`business_address_proof`	Business address proof
`/compliance/owners`	`owner_{n}_identity`	Owner's ID document
`/compliance/owners`	`owner_{n}_address`	Owner's proof of address
`/compliance/business/shareholders`	`owner_{n}_identity`	Shareholder's ID document
`/compliance/business/shareholders`	`owner_{n}_address`	Shareholder's proof of address

> **Note:** `{n}` is the 0-based array index matching the position in the JSON array.

Supported File Types

Content Type	Max Size
application/pdf	1 MB
image/jpeg	1 MB
image/png	1 MB

10. Error Handling

HTTP Status Codes

Code	Meaning	Action

200	Success	Process response
400	Bad Request	Fix request data
401	Unauthorized	Refresh token
409	Conflict	Version mismatch - refresh and retry
413	Payload Too Large	Reduce file size (max 1 MB)
422	Validation Error	Fix field errors

Error Response Format

```
{
  "code": 422,
  "message": "Compliance validation failed",
  "errors": [
    { "step": "owners[0]", "field": "full_name", "message": "This field is required"
},
    { "step": "owners[0]", "field": "id_document_type", "message": "Invalid value.
Allowed: nin, bvn, international_passport, drivers_license" }
  ]
}
```
